Some gamers increase their base bet after a streak of non-Double results (psychology-based "hot-hand" method).Statistically unimportant in isolation, however can marginally enhance ROI when combined with a vibrant bet-sizing algorithm. **Bankroll Segmentation**Divide the total bankroll into three "pockets": (i) Regular play, (ii) Bonus-focused, (iii) High-variance "all-in" for Crazy Time only.Allows disciplined threat management, preventing a single unlucky streak from erasing the whole bankroll. **Timing the Host's "Big-Spin" Cue**The host periodically signifies a "huge spin" (e.g., by saying "Alright, let's get crazy!") which traditionally coincides with a slightly higher incidence of reward hits (≈ 0.5% increase).Exploiting this pattern can enhance hit probability, though it is not ensured and should be used sparingly.
