- **Non-Toxic Finishes:** Look for low-VOC (unstable organic compounds) or water-based paints and sealants, especially for children's furnishings.
- **Bed mattress Thickness:** Check the optimum allowed mattress density for the top bunk. If a bed mattress is too thick, it reduces the reliable height of the security guardrail.

How to Choose the Right Mattress

- **Low-Profile Innerspring:** Traditional coils offer terrific support and bounce, however guarantee the profile does not exceed 6 to 8 inches for the leading bunk.
- **Memory Foam:** Conforms to the body and isolates motion well (implying tossing and turning will not shake the entire frame). Guarantee it isn't too heavy for slatted frames.
