Game Phase Description Participant Action **Pre-Flight** Establishing criteria and seeing previous flight information. Adjust settings and get ready for launch. **Ascent** The airplane takes off; multipliers begin to increase. Monitor the flight course and multiplier development. **Travelling/ Mid-Game** Weather events or speed increases may occur. Evaluate danger vs. benefit in real-time. **Termination/ Cash-Out** The flight concludes either by choice or threat. Carry out the collection command before catastrophe strikes.
