Bamboo Flooring-A New Trend

Bamboo flooring is a type of wood flooring that has gained popularity in the recent years. Bamboo is a type of grass that grows all over Southeast Asia, and China and it has become a high quality alternative to the traditional hard wood floors seen in the past. Bamboo flooring has become especially popular in the southeast and west coast areas due to its solidness and appearance. Professionals in the flooring business are always looking for good flooring materials to promote to their clients. They are looking for high quality floors that look good and withstand everyday lifestyles as well. Bamboo flooring does both these things and that is why it is a good flooring material choice.Bamboo stalks mature in just five years and reach heights well over 50 ft. Since bamboo renews itself naturally it is an environmentally friendly alterative to using wood from trees which can take anywhere from 50 to 100 years to mature. Bamboo, a type of grass, grows into a material that is very hard and durable. Bamboo can grow in areas Click for info with fair to poor soil, making it one of the fastest growing plants in the world. Even after harvesting bamboo continues to grow vigorously, which makes it an extremely good alternative to other flooring options.Bamboo floors are a great way of adding value to your home since they are just as hard, durable, and attractive as traditional hardwood floors. When people are looking for floors for their home, they look for durability, fair pricing, and good looks. Bamboo flooring not only looks fashionable and attractive it is also very durable, almost as hard as steel! It is also environmentally friendly which is beginning to make it more popular. More and more suppliers are starting to carry bamboo floors.Bamboo flooring comes in colors like lightwood, honey, dark wood, and amber which have all been known to be popular. Carbonization and pressure steaming are techniques used to create the dark colors seen on a lot of bamboo floors. Bamboo flooring panels can also be arranged in many different pattern types. Patterns that are usually seen are vertical or flat grain and bamboo floors are usually nailed down or floated. Unfinished as well as pre-finished bamboo panels are available and can be found online sold by bamboo suppliers or in flooring centers.Bamboo floors are always a good option when you are looking to buy a new floor. Bamboo floors are cost effective, durable, stable, fashionable, and environmentally friendly. Any homeowner looking to buy a new floor should really give bamboo a chance since they really are a cheaper alternative to traditional hardwood floors and are very easy to maintain.
