Rather of viewing a rocket or a line ascend on a chart and trying to cash out before it crashes, Limbo players simply select a target multiplier and press "Bet."

The game's algorithm then generates a random number. If the created number amounts to or higher than the player's selected target multiplier, the bet wins. If it falls short, the bet loses.

The name "Limbo" uses the classic limbo dance idea: *How low can you go?* Or, when it comes to multipliers, *How high can you aim?* Players can usually target multipliers ranging from a modest 1.01 x all the method as much as a shocking 1,000,000 x, depending on the particular casino's limitations.

2. **Select a Target Multiplier:** The gamer inputs their wanted winning multiplier (e.g., 2.00 x, 10.50 x, or 500x).
3. **Check the Win Chance:** As the target multiplier changes, the game automatically determines the mathematical probability (Win Chance) of hitting that multiplier.
4. **Roll/ Spin:** The player clicks the bet button.
5. **The Result:** The system reveals the produced multiplier. If it meets or goes beyond the target, the payout is calculated quickly (Bet Amount £ \ times £ Target Multiplier).
