- **How it works:** Place one big bet with an auto-cashout set really low (e.g., 1.20 x) to cover your preliminary stake, and put a second, smaller sized bet that you manual-cashout for higher multipliers (e.g., 5x or 10x).
- **The Goal:** Mitigate losses. If the second bet wins big, it's pure revenue; if it crashes early, the very first bet ideally cushioned the blow.

3. The Martingale (Proceed with Caution)

- **How it works:** Double your bet after every loss, intending to recover all previous losses with a single win at a 2.00 x multiplier.
- **The Risk:** This requires a massive bankroll and can quickly hit table limitations or exhaust funds throughout a cold streak. Use this strategy only with stringent loss limits.
