To successfully wager Crazy Time, individuals can divide their wagers into 2 primary categories: **Number Bets** and **Bonus Game Bets**.

1. Number Bets (1, 2, 5, 10)

- **Number 1:** The most common segment on the wheel. It provides the most affordable volatility and a 1:1 payout.
- **Number 2:** Offers a 2:1 payment and covers nearly a quarter of the wheel.

- **Number 5 and Number 10:** These represent higher-risk, higher-reward number sectors. They appear less often but offer better returns when struck.

2. Perk Game Bets

The reward rounds are the primary destination of *Crazy Time*. To take part in a benefit round, a player should have an active bet put on that particular bonus segment. - **Money Hunt:** A shooting gallery featuring 108 random multipliers hidden behind interactive targets.
- **Crazy Time:** The ultimate benefit round, opening a virtual door to an enormous secondary wheel with enormous multipliers up to 20,000 x.

The Role of the Top Slot

Including an additional layer of excitement to every spin is the **Top Slot**. Found straight above the main cash wheel, this two-reel slot spins all at once with every round.

- The left reel selects a bet spot (a number or a bonus game).
- The right reel picks a random multiplier (ranging from 2x up to 50x).

If the Top Slot successfully matches the winning segment on the main wheel, the multiplier is applied either to the winning number payout or to the multipliers inside the subsequent bonus offer video game. This mechanic is crucial for those wanting to optimize their prospective returns when they wager Crazy Time.
