Players can bitz.io money their casino accounts directly with SOL or associated SPL tokens (Solana-based tokens), play a range of digital video games, and withdraw their winnings nearly instantaneously. The migration of crypto gamblers from older networks to Solana is driven by numerous unique technological advantages.

Solana boasts a block time of roughly 400 milliseconds. Profits are moved to a gamer's self-custody wallet in the blink of an eye.

2. Microscopic Transaction Fees

Gas charges on Ethereum can in some cases cost more than the real bet a player wants to place during periods of high network congestion. On Solana, deal charges typically cost a fraction of a cent (£ 0.00025 per transaction). This makes micro-transactions and small bets completely practical without costs eating into the player's bankroll.

Many credible Solana gambling establishments use cryptographic algorithms called "Provably Fair" systems. This enables gamers to separately confirm the randomness and fairness of every video game result (such as a spin of the digital roulette wheel or a card handled blackjack) on-chain, eliminating the possibility of home adjustment.
