Not every screen problem is a cracked screen. Phones can show perfectly intact glass and still misbehave, with a picture that flickers, patches that will not respond to a finger, a faint pink or green tint, or lines that appear when the phone warms up. Working out which part is actually to blame is the sensible first step, and at Free Fusion in Corby, diagnosis is free for local customers, so you can find out before you spend anything on phone screen repair.

A diagnostic check is a methodical look at the phone, not a quick glance. We examine the glass and frame for damage, test the touch response across the whole display, and look at brightness, colour and any visible lines. We also check that the cause is not something else wearing a screen disguise. A swollen battery can push a display up from underneath, a loose connector can cause flicker, and software glitches can mimic hardware faults. Spotting those differences saves you from paying for a part that was never the problem.

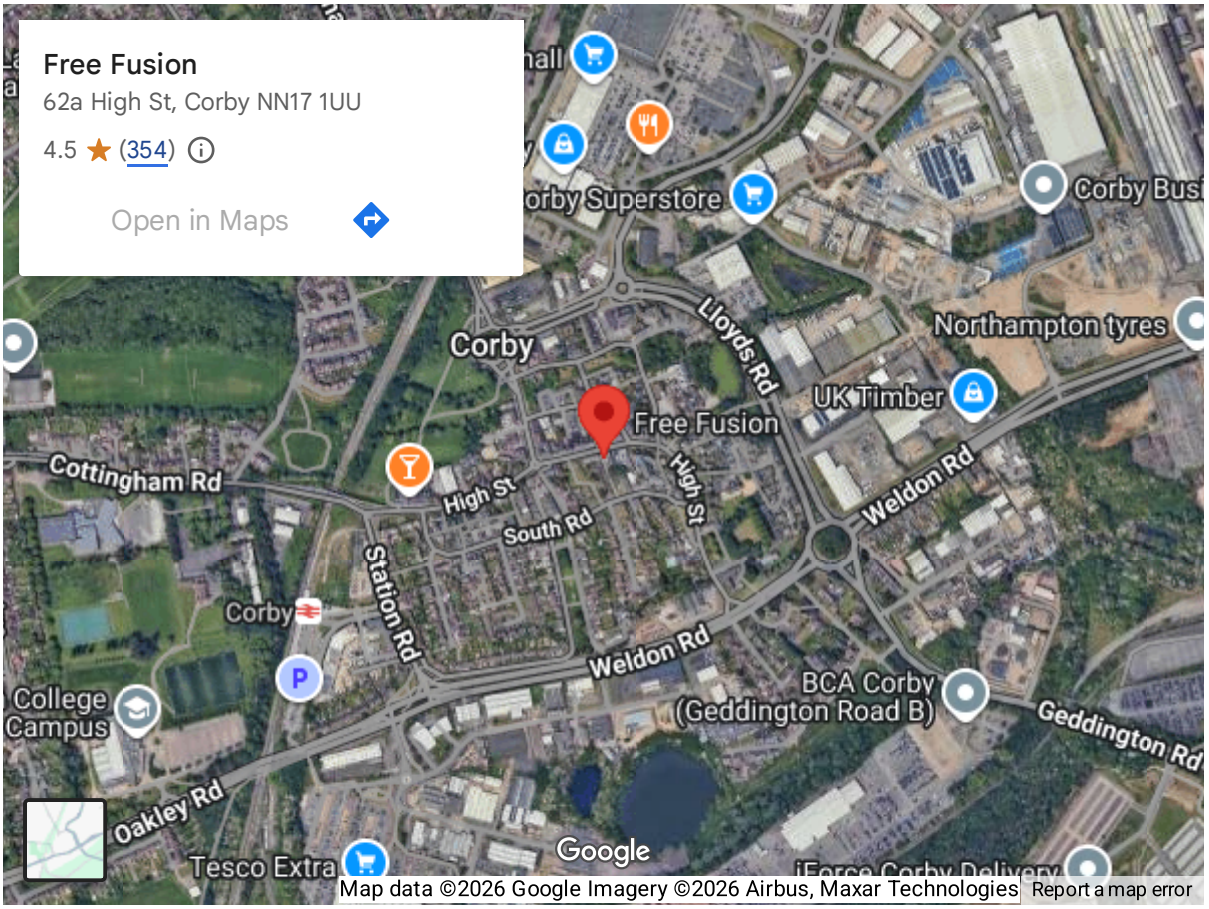

It helps to arrive with a little information. Tell us when the problem began, whether the phone has been dropped or got wet, and whether the symptoms come and go or stay constant. If you can, back the phone up first, and note any passcode we may need to test the touch and display properly. None of this is essential, and if you are unsure we can walk you through it at the counter. The aim is simply to give us enough background to reach the right answer faster.

Free Fusion | 62a High St, Corby NN17 1UU | 01536 260 558

After the check, you get a straight explanation of what we found and what your options are. Sometimes the answer is a screen, and an iPhone screen replacement starts from £24.99, with most smartphone screen replacements completed within about an hour. Sometimes the answer is something smaller or different, and sometimes it is phone screen repair that the phone is not worth putting more money into. You are under no pressure to go ahead, and a clear answer is worth having either way.

Our free diagnosis is for local customers, which means people in and around Corby, including Weldon, Gretton, Stanion, Geddington, Rushton, Kettering and Oundle. If you live further away, our postal service across the UK via Royal Mail and DPD lets us test your device without a long journey, and mailed devices are typically tested and dispatched the same day they arrive. To book a quick check, call 01536 260 558 or walk in to 62a High St, Corby.
