What is Crazy Time?

At its core, Crazy Time is developed around a huge, 64-segment mechanical cash wheel operated by a live presenter. The game happens in a vibrantly colored, whimsical studio that feels more like a set from a children's television program than a gaming flooring.

Gamers put bets on numbers (1, 2, 5, or 10) or on one of the four perk games (Coin Flip, Cash Hunt, Pachinko, and Crazy Time). If the wheel stops on the sector a player has actually bet on, they win a payment or gain [Look at this website](#) entry into an interactive perk round.

Understanding the Betting Layout

Before every spin of the primary wheel, gamers have a limited time to put their chips on the wagering grid. Understanding the frequency of each sector on the wheel is vital for understanding the game's volatility.

- **Number 1:** Appears 23 times on the wheel. Pays 1:1.
- **Number 2:** Appears 13 times on the wheel. Pays 2:1.
- **Number 5:** Appears 7 times on the wheel. Pays 5:1.
- **Number 10:** Appears 4 times on the wheel. Pays 10:1.
- **Coin Flip:** Appears 4 times on the wheel. Activates the Coin Flip reward.
- **Money Hunt:** Appears 2 times on the wheel. Triggers the Cash Hunt reward.
- **Pachinko:** Appears 2 times on the wheel. Sets off the Pachinko reward.
- **Crazy Time:** Appears 1 time on the wheel. Activates the ultimate benefit round.

The Top Slot Feature

Above the primary cash wheel sits a smaller sized, two-reel fruit machine called the **Top Slot**. With every spin of the primary wheel, the Top Slot also spins instantly. It produces a random multiplier and sets it with a random bet spot (either a number or a reward game).

If the primary wheel arrive at the specific matching sector, the payment for that number or the multiplier for that perk round is enhanced appropriately. This is where massive payouts can start to form before players even reach a bonus round.

The Four Extravagant Bonus Rounds

The true heart and soul of Crazy Time are its four perk rounds. These mini-games transport gamers far from the main wheel and into immersive, computer-generated bonus environments.

1. Coin Flip

The easiest of the 4 perk rounds, Coin Flip provides a fast and simple mechanic.

- **How it works:** A coin with a red side and a blue side is placed in a mechanical flipper. Each side is assigned a random multiplier before the flip.
- **The Outcome:** Whichever color deals with upward when the coin lands identifies the multiplier applied to the gamer's stake.

2. Money Hunt

Money Hunt is an interactive shooting gallery design video game where players need to make a split-second decision.

- **How it works:** A huge screen shows 108 random multipliers hidden behind numerous symbols (such as a cactus, a target, a chef's hat, etc).
- **The Outcome:** Players are provided a brief countdown to goal and fire an on-screen cannon at a symbol of their choice. As soon as the timer ends, all signs expose their surprise multipliers, and the gamer wins whatever worth was behind their chosen target.

3. Pachinko

Inspired by the traditional Japanese arcade video game, the Pachinko reward round is everything about gravity and thriller.

- **How it works:** The presenter climbs up to a platform and drops a puck down a large board filled with physical pegs. At the bottom of the board are various multiplier worths, along with a "DOUBLE" zone.
- **The Outcome:** The puck bounces down the board and lands in one of the multiplier slots. If it lands on "DOUBLE," all multipliers at the bottom of the board double in value, and the speaker drops the puck a 2nd time. This can repeat until the maximum multiplier limit is reached.

4. Crazy Time

The holy grail of the video game, Crazy Time takes gamers behind an enormous red door into a surreal, Alice-in-Wonderland-style virtual world.

- **How it works:** Players are confronted with a massive virtual wheel including 64 sections filled with big multipliers and "DOUBLE" or "TRIPLE" wedges. Before the wheel spins, players need to choose one of three

flippers (Green, Blue, or Yellow).

- **The Outcome:** The speaker presses a huge red button to spin the wheel. Whichever sector lines up with the gamer's picked flipper identifies their reward. If the wheel lands on "DOUBLE" or "TRIPLE," all multipliers on the wheel are doubled or tripled, and the wheel spins once again. This process can repeat, possibly resulting in the video game's maximum advertised payout of 20,000 x the bet.

Methods and Approach

While Crazy Time is fundamentally a video game of opportunity governed by random number generators (RNG) and physical physics, gamers often utilize various tactical techniques to handle their bankroll and maximize their home entertainment time.

- **The Low-Volatility Approach (The Safety Net):**
 - Focusing heavily on numbers 1 and 2, that make up a substantial portion of the wheel. This technique yields regular, smaller sized wins that help sustain the player's balance for a longer period.
- **The Bonus Hunter Approach:**
 - Wagering specifically or predominantly on the four bonus rounds (Coin Flip, Cash Hunt, Pachinko, and Crazy Time). Since these sections appear less often on the wheel (just 9 sections total), this approach includes longer droughts in exchange for access to the game's main function destinations.
- **The Balanced Approach:**
 - Spreading small bets across both numbers and reward rounds to make sure eligibility for the perk mini-games while keeping a cushion from routine number hits.
