Originating in the cryptocurrency casino sector, Limbo is a streamlined variation of the timeless "crash" game mechanic. However, rather of watching a spaceship or a multiplier line climb upwards and wishing to squander before a crash, Limbo presents a more direct approach.

Gamers set a target multiplier (e.g., 5.00 x). The game then creates a random multiplier. If the generated multiplier is equivalent to or greater than the player's target, the bet wins. If it falls listed below the target, the bet is lost.

The appeal lies in the control it gives the gamer. You aren't responding to a moving chart in real-time; rather, you pre-select your threat tolerance and see the outcomes immediately.
