Developed by Autowatch, the Ghost Immobiliser is the world's first aftermarket CAN-bus immobiliser. Unlike standard alarm systems or immobilisers that count on different essential fobs or loud sirens, the Ghost is totally concealed within the vehicle's circuitry harness.

It works by intercepting the signals on the vehicle's Controller Area Network (CAN-bus). - **Undetectable by Thieves:** Because there are no extra key fobs, LEDs, or radio frequency signals, diagnostic devices can not find the system.
- **No Wire Cutting:** The gadget communicates directly with the automobile's data network without the requirement to cut standard automobile loom wires.
