What is the Ghost 2 Immobiliser?

The Autowatch Ghost 2 is a next-generation, second-generation aftermarket immobiliser created particularly to prevent automobile theft. Unlike traditional immobilisers that count on separate key fobs or radio frequency tags (which burglars can quickly obstruct, clone, or steal), the Ghost 2 incorporates perfectly into the car's existing electrical wiring loom.

Crucially, the Ghost 2 has **no essential fobs and no LED status lights** to offer away its place. It operates silently and inconspicuously, safeguarding the automobile through the vehicle's native buttons-- such as those on the steering wheel, centre console, or door panels.

How Does the Ghost 2 Work?

When the Ghost 2 immobiliser fitting procedure is complete, the vehicle can not be started unless an unique, secret PIN code is gotten in.

- **The Sequence:** Before driving, the user needs to tap a specific sequence of buttons (e.g., Volume Down, Rear Demister, Accelerator Pedal) within a set timeframe.
- **The Confirmation:** The car's dashboard indications (normally the threat lights or the engine management light) will flash a specific variety of times to verify the right code has actually been gotten in.
- **The Lockout:** If the right series is not gotten in, the automobile just will not begin, or it will stall instantly if forced. In addition, even if a thief steals your real physical automobile keys, they can not drive the automobile away without knowing the secret PIN sequence.

Secret Features of the Ghost 2

- **Undetectable by Scanners:** Thieves utilize diagnostic equipment to scan for aftermarket security systems. The Ghost 2 communicates via the vehicle's CAN bus network, making it undetectable to standard diagnostic tools.

- **No Wire Cutting:** Professional installation makes sure that wires are not pointlessly cut or spliced in manner ins which void service warranties.
- **Service/ Valet Mode:** Allows the vehicle to be turned over to mechanics or valets without disclosing the secret PIN code.
- **Mobile Phone App Integration:** Users can combine their mobile phone through Bluetooth as a secondary authorisation gadget, permitting the cars and truck to begin instantly when the authorized phone is in close distance.

The Ghost 2 Immobiliser Fitting Process: What to Expect

Setting up a Ghost 2 is not a DIY task. It needs specialized auto-electrical knowledge, proprietary software, and a deep understanding of complex vehicle CAN bus systems.

Here is a detailed breakdown of what a professional installation involves:

1. Lorry Assessment and Preparation

The technician starts by recognizing the make, design, and year of the vehicle. They examine the specific CAN bus architecture to determine the very best combination points and readily available button series.

2. Locating the CAN Bus Connection

Modern vehicles utilize a Controller Area Network (CAN bus) to allow microcontrollers and gadgets to communicate with each other without a host computer system. The professional take advantage of this network, generally behind the control panel or near the steering column, where the Ghost 2 can obstruct signals.

3. Discreet Integration

Due to the fact that the unit has no physical tags or popular LED signs, it can be hidden deep within the car's internal electrical wiring harness. A professional fitter guarantees the unit looks like a factory-installed component, making it virtually difficult for a burglar to locate and get rid of.

4. Programming the PIN Sequence

When the hardware is linked, the service technician programs the initial PIN sequence using the cars and truck's existing buttons. The owner is then guided through the procedure of changing this momentary code to their own customized, safe and secure series.

5. Checking and Handover

The final phase includes strenuous testing. The service technician confirms that:

- The automobile will not start without the PIN.
- The car begins typically *with* the correct PIN.
- Service mode works properly.
- The smartphone app (if used) sets and runs properly.
