What is the Aviator Casino Game?

Developed by Spribe, Aviator is a social multiplayer game belonging to the "crash game" genre. Unlike standard slots where a random number generator (RNG) immediately exposes a win or a loss, Aviator presents a dynamic, real-time component.

The premise is simple: an aircraft removes, and as it ascends, a multiplier coefficient boosts. The goal for the gamer is to squander their jackpots before the aircraft arbitrarily flies away. If the gamer fails to squander before the "crash," their bet is lost.

The game's appeal depends on its transparency, speed, and the psychological tug-of-war between greed and caution-- do you squander early for a modest win, or wait a couple of more seconds for a huge payment, risking it all?

How Aviator Works: Step-by-Step

For newbies entering the Kenyan online casino market, understanding the mechanics of Aviator takes just a few minutes. Here is how a normal round unfolds:

1. **Place Your Bets:** Before the round begins, gamers have a brief window (usually about 5 to 10 seconds) to position one or two synchronised bets.
2. **The Takeoff:** The red airplane takes off, and the multiplier starts at 1.00 x, ticking up rapidly (e.g., 1.50 x, 2.30 x, 10.45 x, and possibly approximately 100x or more).
3. **The Cash Out:** Players need to strike the "Cash Out" button before the aircraft flies off the screen.
4. **The Calculation:** If effective, the payment is determined by multiplying the initial bet by the multiplier at the exact moment of squandering.
5. **The Crash:** At a completely random point identified by a provably fair algorithm, the plane flies away. Anybody who hasn't squandered loses their stake.

- **Pros:** Minimizes threat by protecting a security net with the first bet while keeping the door open for a rewarding payment on the second.
