In the gambling establishment variation, a player drops a ball (or puck) from the top of a triangular pyramid of pegs. As the ball descends, it ricochets off the pegs up until it lands in one of the slots at the bottom, each assigned a particular multiplier.

Unlike traditional slots, which depend on complicated reel signs and paylines, Plinko provides a direct visual path in between the bet and the result. This transparency-- the capability to enjoy the ball navigate the board-- is an enormous part of its appeal, though it is essential to note that the course of the ball is figured out by an algorithm, not physical gravity.

Middle-Center	1.1 x-- 2.0 x	High
Near Edges	5x-- 10x	Low
Far Edges	100x-- 1000x	Very Low

Keep in mind: Payouts differ considerably depending upon the software application supplier.
