2. **Guardrails:** Both sides of the top bunk must feature secure guardrails. The distance between the bed mattress base and the top of the guardrail should be at least 160mm to avoid nocturnal rolls.
3. **Matress Depth Warnings:** Manufacturers will always define an optimum bed mattress depth for the top bunk. Disregarding this can minimize the efficient height of the guardrail, positioning a safety danger.
4. **Age Recommendations:** UK security guidelines generally recommend that **children under the age of 6 ought to not sleep on the leading bunk** due to the threats related to falls and lack of coordination.
