The mechanics are straightforward:

4. **The Winner:** At the end of all rounds, the player (or group) who has collected the greatest overall monetary worth of skins wins **all** the items dropped in the battle-- consisting of those opened by challengers.

If luck is on a player's side, they can walk away with an inventory worth exponentially more than their initial buy-in. If luck fails, they lose whatever. It is this high-risk, high-reward dynamic that drives the tremendous popularity of the format.
