What is Plinko Gambling?

At its core, Plinko is a game of opportunity. Unlike poker or blackjack, which require skill, memory, and decision-making, Plinko is determined entirely by a Random Number Generator (RNG) or, in the case of Provably Fair games, an algorithmic seed.

When a player places a bet, they are wagering on where the "puck" or "ball" will land at the bottom of the pyramid. The board is populated with a triangular variety of pegs. As the ball comes down, it hits these pegs, veering left or ideal in a pseudo-random style up until it falls under a slot at the bottom. Each slot corresponds to a particular multiplier, varying from fractions of the player's stake (a loss) to massive multiples (a win).
