What is a Ghost Immobiliser?

Established by Autowatch, the Ghost Immobiliser is the world's first aftermarket CAN-bus immobiliser. Unlike traditional alarm systems or immobilisers that count on separate essential fobs or loud sirens, the Find out more Ghost is totally hidden within the vehicle's wiring harness.

It works by obstructing the signals on the vehicle's Controller Area Network (CAN-bus). When a motorist attempts to begin their car, the engine will not crank or begin unless a special, secret PIN code-- ranging from 4 to 20 presses-- is entered utilizing existing buttons in the lorry (such as steering wheel controls, door panels, or the center console).

Key Features of a Ghost Immobiliser:

- **Undetectable by Thieves:** Because there are no extra key fobs, LEDs, or radio frequency signals, diagnostic devices can not find the system.
- **No Wire Cutting:** The device communicates directly with the lorry's information network without the requirement to cut basic vehicle loom wires.
- **Service/Valet Mode:** Allows the cars and truck to be serviced or parked by a valet without jeopardizing the secret PIN code.
- **Weatherproof:** Small and long lasting sufficient to be concealed deep within the lorry's internal architecture.
