

Counter-Strike 2 (CS2) has revived the beloved skin economy that made its predecessor a cultural phenomenon. Among the thousands of cosmetic items, a small subset stands out for their scarcity, aesthetic appeals, and market price-- CS2 unusual skins. In this post, we'll break down what makes a skin "rare," analyze the rarity tier system, highlight the most desirable antiques, and provide useful suggestions for collectors and financiers alike.

## What Defines a "Rare" Skin?

In CS2, "uncommon" does not describe a [csgo case opening](#) single classification. Instead, rarity is a combination of numerous qualities:

1. **Rarity Tier**-- The official drop-rate category assigned by Valve (e.g., Mil-Spec, Restricted, Classified, Covert, Rare Special Item).
2. **Drift Value**-- The amount of wear (from 0.00 to 1.00). Lower float numbers frequently suggest a cleaner appearance and greater desirability.
3. **StatTrak™**-- A special turning point that tracks kills. StatTrak variations of particular skins command a premium.
4. **Age & Availability**-- Skins that have actually not been readily available for purchase for several years, or those that were removed from the video game's loot tables, become increasingly scarce.  
**Aesthetic Demand**-- Unique surfaces, lively colors, or thematic ties to significant occasions can drive demand beyond what the base rarity tier would recommend. **Rarity Tier Overview Below is a succinct table of the standard rarity tiers**
