What is a CS: GO Case Battle?

Once the battle starts, the system simultaneously opens the chosen cases for all individuals over a number of rounds. At the end of the battle, the overall financial worth of all the skins dropped for each gamer is determined.

The gamer with the highest cumulative skin value wins all the products dropped in the battle, including their challengers' skins.

Why Case Battles Have Surpassed Traditional Unboxing

Traditional case opening is infamously unforgiving. The chances of unboxing a covert knife or glove are approximately 0.26%, suggesting gamers frequently spend hundreds of dollars without seeing a substantial return. Case battles modified the mental and mathematical landscape of skin acquisition for several reasons:

- **Potentially Better Return on Investment (ROI):** In standard unboxing, your house always wins in the long run. In a case battle, even if a player opens bad skins, they can still win the match just by out-lucking their

challenger, leaving with double or triple their initial investment.
