What is the Aviator Casino Game?

At its core, Aviator is a multiplayer social game constructed around an increasing multiplier curve that can "crash" at any moment. Unlike standard slots where a random number generator (RNG) identifies the outcome of a fixed spin, Aviator gives gamers a sense of agency.

The property is deceptively easy:

1. An airplane takes off on the screen.
2. As the plane climbs up greater, the multiplier connected to the gamer's bet increases.
3. The goal is to cash out before the airplane flies away (crashes).
4. If a gamer cashes out in time, they win their stake increased by the present coefficient. If the airplane flies away before they squander, the bet is lost.

The game's visual is deliberately minimalist, reminiscent of early computer system graphics, which ensures it runs smoothly on both home computer and mobile phones without lagging.

 - Place a bigger bet on the very first slot and set an auto-cashout at a low multiplier (e.g., 1.30 x) to cover the cost of both bets.
 - Place a smaller sized bet on the second slot and let it run for a greater, riskier multiplier (e.g., 10x or greater) to chase a considerable payout.
- **The Goal:** Mitigate losses while keeping the door open for a big win.
