Rather of one gamer opening cases in isolation, a shared lobby is developed. Both (or all) gamers open their picked cases round by round. The system tracks the monetary worth of every skin dropped throughout the fight. When the last case is opened, the total worth of all skins dropped for each gamer is tallied. **The player with the highest total combined value wins the whole contents of the pot**-- meaning they keep their own drops *plus* the drops of their challengers.

Most platforms use numerous video game modes to keep the action fresh:

- **Free-for-All (FFA):** Three or more gamers battle, with the greatest total worth taking everything.
- **2v2/ Team Battles:** Players pool their resources and values together to defeat a competing team.
