In Big Bass Crash, an angler sets sail in his boat. As he takes a trip throughout the water, a multiplier starts ticking up from 1.00 x. The goal for the gamer is simple, yet agonizingly tense: **squander before the angler's line snaps, the fish escapes, or the boat crashes.**

If a gamer squanders in time, they win their stake increased by the present value on the screen. If they wait too long and the video game "crashes," the bet is lost.
