What is the Aviator Game?

Established by Spribe and launched in 2019, Aviator is a multiplayer social game coming from the "crash [ke.bitz](#) game" genre. Unlike standard casino video games that count on reels or card decks, Aviator is developed around a rising curve that can crash at any moment.

The property is deceptively easy: an aircraft takes off, and as it climbs up, a multiplier increases. The gamer's goal is to squander their jackpots before the plane all of a sudden flies away. If the gamer cashes out in time, they win their stake increased by the present coefficient. If the plane flies away before they cash out, the bet is lost.

Core Features of Aviator

- **Real-Time Multiplayer:** Players from all over the world play the same round at the same time.
- **Live Chat:** An integrated chat function allows players to engage, share techniques, and celebrate wins together.
- **Live Statistics:** Users can view the history of recent multipliers, along with bets and payouts made by other gamers in real-time.
- **Provably Fair Technology:** The game makes use of a cryptographic system that allows gamers to confirm the fairness of every round.

Playing the game is straightforward, making it accessible to both newbies and knowledgeable video gaming lovers. Here is a breakdown of how a standard round profits:

1. **Place Your Bets:** Before the round starts, players have a quick window (normally around 5 seconds) to place one and even 2 synchronised bets.

3. **Cash Out:** This is the turning point. The gamer should click the "Cash Out" button before the aircraft flies away.

Players can individually check the fairness of any round by clicking the history icon in the game menu, ensuring that neither the platform nor the developer can control the outcomes retroactively.
