A Brief History of Vacuum Cleaners

The first person to patent a machine for cleaning was David Hess in the year 1860. Housewives all over America had turned to using rugs and carpets, a trait brought over by the waves of immigrants coming from Europe, to cover their bare wood floors and keep the dust and dirt to a minimum. When they were dirty, they had to be carried outside, suspended somehow Knox holiday lighting in the air and then beaten with a metal rod or heavy wooden stick. A bit later someone invented a small, tennis racket-looking device called a rug beater for precisely this purpose. Mr. Hess soon realized that there was probably an easier way to clean rugs without all the fuss and mess and he invented the Carpet Sweeper which had a rotating brush combined with a bellows system that created suction. His amazing invention also used two water chambers to trap the dust and fine dirt. The Knox Family Christmas Light Installers only problem with Mr. Hess machine is that there is no proof it was ever produced.After Mr. Hess invention, there came a period of wilder and weirder inventions that sought to accomplish the same thing. In the late 1870s, Melville Bissell (sound familiar?) marketed a carpet sweeper that picked up the dirt and dropped it into a pan behind the rotating brush. In 1899, John Thurman invented a gasoline-powered vacuum cleaner that is credited as being the first motorized version. In 1901 Hubert Booth of London invented the electric vacuum, a device so large that it was parked outside the house and a 100-foot long hose snaked its way inside and did the dirty work. The device was so popular that housewives all over London held vacuum parties to enjoy the event. It wasnt until 1908 when James Spangler, a janitor in Ohio, invented the first portable, suction cleaner — the precursor to todays high tech machines. He sold his patent to his cousins husband, William Hoover (also familiar?) and the rest, as they say is history.

Knox Christmas Lights provides professional Christmas light installation in Knoxville, TN, creating stunning holiday displays for homes and businesses. From custom design and safe installation to maintenance, removal, and storage, their experienced team delivers a hassle-free holiday lighting experience using premium commercial-grade LED lights that brighten your property all season long.

Knox Family Christmas Light Installers
Address: 3214 Tazewell Pike #100, Knoxville, TN 37918, United States
Phone: (865) 263-4660
