Weapon skins were no longer just static textures; they ended up being tradable, marketable commodities. For many years, Valve transitioned from randomized post-game drops to curated collections tied to significant operations and standalone case releases.

While CS: GO has actually formally transitioned into Counter-Strike 2, the community still commonly refers to these containers by their tradition name. The environment has actually grown from a handful of basic weapon finishes to hyper-detailed, community-designed masterpieces including StatTrak™ technology, customized wear rankings, and incredibly uncommon unique products like knives and gloves.

How CS: GO Cases Work

When a secret is used on a case, an algorithmic roulette spins through numerous tiers of weapon surfaces. The probability of unboxing items is greatly manipulated towards lower-tier products, making high-tier drops remarkably unusual and important.
